

CHEATERS AMONG CLASSMATES

There are some **Cheaters** among us

RULES

People work in teams or choose to work by themselves. Singles players get double tickets for correct answers. At the end of each round everyone votes who they think the cheater is and that person is kicked out. The cheater is not revealed until the end of the final round. It becomes harder to find the cheater with each round because there are less questions/time to notice cheating behaviors. A cheater can decide to tell the team, become a single player, or stay on the team but keep it a secret. Vote someone out at the end of each round but the cheater does not reveal themselves until the end of the game.

4 groups (plus however many single players) playing family feud style. Teams will be asked a question and have 30s-1 minute to answer it. Next one player from each team will come up and say their teams answer. After each round the entire class will vote who they think the cheater is and that player will be voted out. After each round any player can decide if they want to become a single player or remain in their team.
